

## BACHELOR OF ARTS IN PHYSICS CURRICULUM GUIDE

Requirements effective for Fall 2018

The BA degree in physics requires a minimum of **35 credits in physics**, CHY 121/123, ENG 101, and **15 credits in mathematics**. In addition, the student must take 63 credits of additional electives (18 of which are the minimum to satisfy the University's General Education requirements), for a total of 120 credits.

Below are two sample curricula, the first showing how a typical student can complete the requirements with physics courses spread out over four years, and the second designed for the student who decides to major in physics in the sophomore year. There are many other possible arrangements; usually the student will design an individualized program with an advisor from the Department of Physics and Astronomy.

### Sample #1 PHYSICS CURRICULUM

**Minimum Total Credits in the BA in Physics Program: 120 (without PHY 100)**

The following curriculum is designed for those students who desire a degree in physics but who wish greater breadth in background in other areas of science—such as biological, chemical, earth, or environmental sciences. The program outlined below enables a student to begin a major in physics during the sophomore year.

#### Notes

- Human Values/ Social Context and Ethics (HV/SC & E), part of the University General Education Requirement, can be satisfied by a careful selection of at least six three-credit courses.

2. Two writing intensive courses are required to satisfy the University's General Education Requirement. A student must choose one of the following options:
  - A. Take both PHY 364 and PHY 365;
  - B. Take either PHY 364 or PHY 365 and another writing intensive course.

### Additional Program Requirements

1. The 35 credits in physics (above PHY 100) must include PHY 121 and PHY 122 (or PHY 111 and PHY 112), PHY 200, PHY 223, PHY 229, PHY 262, PHY 231, PHY 236, PHY 400, PHY 364 (or PHY 365), PHY 451, PHY 454, and PHY 481. It must also include at least one 400-level course chosen from AST 451, PHY 447, PHY 455, PHY 463, PHY 469, PHY 470, PHY 472 and PHY 480. First-year students must also take PHY 100.
2. The 15 credits of mathematics must include MAT 126, MAT 127, MAT 228, and MAT 259, or their equivalents.
3. Elective courses must include
  - A. those necessary to satisfy the College of Liberal Arts and Sciences BA requirements, including either a double major or a minor in addition to the Physics BA;
  - B. 6 credits of approved science, engineering, or mathematics electives.
4. A minimum of 72 hours must be outside the major.

### PHYSICS ELECTIVES

Course		FALL SEMESTER
PHY 469	Quantum & Atomic Physics	
PHY 473	Modern Optics Laboratory	
PHY 480	Physics of Materials	
PHY 496	Field Experience in Physics	
PHY 501	Mechanics	
PHY 574	Methods of Mathematical Physics	
AST 451	Astrophysics I (offered in either the fall or the spring semester)	
Course		SPRING SEMESTER
PHY 447	Molecular Biophysics	
PHY 455	Electricity and Magnetism II	
PHY 463	Statistical Mechanics	
PHY 470	Nuclear Physics	
PHY 471	Nuclear Physics Laboratory	
PHY 496	Field Experience in Physics	
AST 451	Astrophysics I (offered in either the fall or the spring semester)	

A student preparing for graduate work in physics is advised to take some or all of the following electives in his or her junior or senior year: PHY 463, Statistical Mechanics; PHY 470, Nuclear Physics; PHY 480, Physics of Materials; as well as additional courses in mathematics.
