

# "Climate Restoration: The Only Future That Will Sustain the Human Race"

Peter Fiekowsky discusses his recently published book

Monday, August 15 2022, at 2:00 PM

In Room 107 Norman Smith Hall, UMaine Campus, Orono

Also available via Zoom at <https://maine.zoom.us/j/2075811035>

Peter is an MIT-educated physicist and engineer, a serial entrepreneur, a philanthropist, and a social innovator. He has worked at NASA and the Fairchild/Schlumberger Artificial Intelligence Lab in Palo Alto; taught at MIT; and developed his own machine vision company, Automated Visual Inspection LLC (AVI). He holds 27 patents and is on the board of Climate Capex, a fintech company designed to help complete the global transition to 100 percent clean energy by 2040 by tripling the rate of investment in solar projects.

Fiekowsky's mission in life is "to leave a world we're proud of to our children." In service to that mission, Fiekowsky has a 30-year track record as a citizen lobbyist for global poverty reduction and climate policy.

Hosted by University of Maine Department of Physics & Astronomy and Climate Change Institute
